Thanks to everyone who showed up this morning to brave the cold and blustery conditions on the Town Moor - a great turnout which saw us all but run out of maps. There were a few comments about control 119 (#2 on orange, #3 on long orange) being located in a particularly shallow depression which is barely visible on the ground, and also a key fence which has completely disappeared over the past few months. However apart from this things seemed to run smoothly, and hopefully you all enjoyed the courses and the navigational and physical challenges that were set.
